

BUTEX Journal of Textile Science and Engineering (BJTSE)

A peer reviewed academic publication of
Bangladesh University of Textiles (BUTEX)

Author's Instructions and Guidelines

Manuscript structure:

- Title and Authorship
- Abstract, Keywords
- Introduction
- Materials and Methods
- Results and Discussion
- Conclusion
- Disclosure statement
- Acknowledgment
- References
- Formulae and Equations

The various sections of the manuscript are described in detail below:

Language

Either British or American English can be used, but be consistent within your article.

Title

Use a brief, specific, and informative title.

Keywords in titles assist in effective literature retrieval. If trade names are used, give generic names in parentheses.

Authorship

List the full first name, middle initial(s), and last name of each author. Omit professional and official titles. An author's affiliation should be based on where they were when the work was performed. Include as co-authors all those who have made a substantial contribution to the work. Addition or deletion of an author(s) after submission of the manuscript requires justification from the corresponding author and is subject to editorial approval.

Changes to authorship

Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. Any addition, deletion or rearrangement of author names in the authorship list should be made only before the manuscript has been accepted and only if approved by the journal Editor.

Abstract

A **150–200-word** clear and concise abstract must accompany Research Articles, Review, Policy Analysis, and Perspective manuscripts. As a one-paragraph summary, describe the purpose, methods or procedures, significant new results, and implications. Define any abbreviations or

acronyms used in the abstract. Include major quantitative data if they can be stated briefly, but do not include background material. Do not include reference numbers in the abstract. For Features, include a shorter 3–5 sentence Abstract, written at a level comprehensible to the scientifically literate general public. An abstract is not required for Viewpoint manuscripts.

Keywords

All articles must be accompanied by **5–8 keywords**. Authors are encouraged to include significant keywords that do not appear in the title to expand discoverability and aid the reader in literature retrieval. The keywords are published immediately before the text, following the abstract.

Introduction

The introduction should clearly and concisely explain the motivation for the work, its importance and originality, where it fits in the development of the field and why it should be of interest to BJTSC readers. Discuss relationships of the study to previously published work, but do not reiterate or provide a complete literature survey. Current findings should not be included or summarized in this section. Introduction sections are typically around 500 words in length.

Materials and Methods

Describe pertinent and critical factors involved in the experimental work but avoid excessive description. Details not essential for understanding the paper can be placed in Supporting Information (SI). Specific experimental methods should be sufficiently detailed for others to repeat the experiments unequivocally. List devices of a specialized nature or instruments that may vary in performance or affect the quality of the data obtained (e.g., spectroscopic resolution), including the vendor. If the procedures are already published, provide citations to previous publications and expand only on differences in the current work. Authors must emphasize any unexpected, new, and/or significant hazards or risks associated with the reported work and this safety information must be included in the Materials and Methods section.

Results and Discussion

Be complete but concise. Discuss your findings, postulate explanations for the data, elucidate models and compare your results with those of others. Avoid irrelevant comparisons or contrasts, any speculation unsupported by the data presented and verbose discussion. A separate conclusion is not to be used; any concluding statements are to be incorporated under Results and Discussion.

Conclusion

The conclusion should clearly and concisely summarized the Current findings in this section. Conclusion sections are typically around 100-120 words in length.

Disclosure statement

No potential conflict of interests should be reported by the author(s).

Acknowledgment

Include only essential credits to acknowledge financial or professional assistance to the conduct of research. Sources of financial support must be acknowledged. Omit academic and social titles.

References

Literature references in *BJTSC* must be numbered in order of appearance, and the corresponding numbers placed at the appropriate locations in the text as superscripted numerals. The accuracy of the References is the responsibility of the authors, who are encouraged to avoid references to works that have not been peer reviewed. DOI numbers are helpful but not mandatory unless they are the only identifying information available (e.g., for recently published articles). Excessive self-citation is not permitted. As a minimum, the full URL should be given and the date when the reference was last accessed.

Supporting Information

The Editorial board may ask for any related information and documents required during peer-review process, before acceptance and publication of the articles.

Submission declaration and verification

Submission of an article implies that the work described has not been published previously or it is not under consideration for publication elsewhere, also its publication is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or in any other language, including electronically without the written consent of the copyright holder. To verify originality, your article may be checked by the originality detection service of journal.
